

*what's the idea ??*

to create a platform that connects innovators, investors, and collaborators with the aim of developing new innovations & technologies.

The platform serves as a space where innovators can showcase their work, collaborate with each other, and seek support from investors.

Investors, in turn, can browse through various innovations, choose projects that align with their interests or goals, and provide financial support to those projects.

Yeh! Also to build a community to get support.

organizing events & competitions

**AIM** : creating new technology innovations to boost startups & products that contribute to global technology.

PRODUCT NAME

***fuse***

Fuse is a social platform made especially for innovators & investors.

where,

innovators can publish their work and can collaborate with other innovators

Collaborators can work on different ideas and projects.
